An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian S. Steinberger on February 24, 2006.

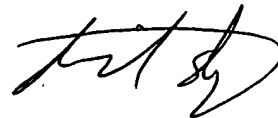

In the claims:

in claim 1, line 11, "means for forming a beam from the emitting tip portion" has been replaced with – a crystal sphere lens adjacent to the emitting tip portion of the main longitudinal crystal for diffusing and amplifying signals from the emitting tip portion of the main crystal, the crystal sphere lens forming a beam –, and
claims 14, 15, 17-23 and 27 have been cancelled.

The following is an examiner's statement of reasons for allowance: The claims are allowable due to the Declarations submitted by applicant declaring that the figure showing the crystal sphere was actually not part of either of the prior art documents and that such figure was not publicly disclosed until March of 2002, which was subsequent the filing date of the instant application. Absent this teaching the examiner has no basis of controlling the "vibratory energy" which would be produced by electrically exciting the crystal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The drawings are objected to because in all figures the lines are not clear and uniformly dark; the numerical indicia are poor quality; and Figure numbering is poor quality. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in a subsequent communication. The objection to the drawings will not be held in abeyance.
